

BUILDING SCIENCE TRAINING & EXERCISE SESSION

Training and Equipment Use Demonstration

Become familiar with important requirements that will soon become mandatory throughout Nevada!

Most builders, HVAC contractors, and code enforcement professionals are asking questions about the ins and outs of residential duct leakage testing. Come to this **FREE** 1/2 day discussion and demonstration and have your questions answered about residential duct sealing and air leakage testing.

- Testing requirements will be implemented in northern Nevada in 2012
- HVAC contractors who properly seal their ducts will encounter fewer customer complaints, which may help to avoid legal actions
- ENERGY STAR Homes and most green building programs require builders to verify duct tightness
- Airtight duct construction is one of the keys to providing a quality heating and cooling system

This course will cover a discussion of code requirements ▪ Building science review ▪ Blower door use and test results demo ▪ Duct blaster use and test results demo ▪ Questions and answers

Through a grant obtained by the Nevada State Office of Energy and administered by the University of Nevada, this training is being offered at **no cost** —

Learn from the experts!

Leon Mills, president of Energy Insight, Inc., is a certified HERS Rater, BPI Building Analyst, and NAHB Research Center verifier. He also serves as the Energy Audit Training Coordinator for Truckee Meadows Community College, helping to build a semi-skilled workforce for weatherization retrofit work and energy auditing. **Paul Taylor** has over 30 years experience in the construction trades, and is also a certified HERS/BPI BA. His company, Sierra Green Builders, provides retrofit upgrades to clients who wish to improve their home's energy efficiency and comfort. Taylor also trains weatherization technicians at TMCC.
