

## Overview

Under the authority of Nevada Revised Statutes (NRS) 251.149, which is part of the Nevada Hazardous Waste Management Act, the Nevada Department of Environmental Protection (NDEP) has issued a rule (NAC 645.013) that requires businesses to determine if their used antifreeze is a hazardous waste. If a business determines that their used antifreeze is a hazardous waste, they must not recycle it. The rule also requires businesses to have documentation that their used antifreeze is not a hazardous waste. If a business generates used antifreeze and is contracting with another business to dispose of their used antifreeze, request

## Recycling Used Antifreeze
