## Regulatory News & Workshops

### Changes to Permits for Concrete Batch Plant and Nonmetallic Crushing and Screening

**Virtual Workshop Wednesday, July 27th, 3:00 - 4:00 pm PST**

The Nevada Division of Environmental Protection (NDEP) will be renewing and making minor changes to the Class II General Stationary Air Quality Operating Permits for Concrete Batch Plants and Nonmetallic Minerals Crushing and Screening.

NDEP will be holding a virtual workshop to review some of the changes such as the addition of new emission factors, the addition of a 3.98 MMBtu/hr propane or natural gas heater for the Concrete Batch Plants, and slightly updated limits based on the Bureau of Air Pollution Control's modeling demonstration.

If you are an existing or incoming minor source in Nevada and currently have one of these permits with NDEP, or are planning to apply for one, you should consider attending this workshop.

The workshop will be held **Wednesday, July 27<sup>th</sup>, 2022 from 3 pm to 4 pm PST.**

#### Microsoft Teams meeting

## **Clark County Offers Virtual Workshop on Preparing for a Minor Source Permit Inspection**

**July 20th from 9:00 am - 10:30 am PST - Register Today!**

Clark County's Department of Environment and Sustainability, Division of Air Quality Small Business Assistance Program is offering a FREE virtual workshop, ***Preparing for a Minor Source Permit Inspection***.

In this workshop they will answer questions such as:

- What to expect before, during, and after an inspection?
- How to prepare for an inspection?
- What records are required?
- What are the levels of enforcement?
- Common deficiencies and how to avoid them.

The workshop will be held virtually on **Wednesday, July 20<sup>th</sup> from 9:00 am to 10:30 am PST**

If you would like to attend, please send an email to [AQSBAP@ClarkCountyNV.gov](mailto:AQSBAP@ClarkCountyNV.gov).

### **Why should you attend?**

Don't be caught by surprise! When a facility receives an air permit from a regulatory agency it comes with many conditions, restrictions, and other requirements. In addition to complying with the conditions, there is also the potential for an inspection by the agency to make sure the facility is abiding by all the requirements stated in the permit. Many facilities are unsure of what to expect during these inspections and are unaware of how to prepare for them. They may not know what will be inspected, what materials to prepare, how long it will take, or what type of enforcement may happen if the facility does not meet the proper standards. Simply being unaware of what to expect and how to prepare can cause problems for the facility and can result in enforcement actions against them.
