

EPA Tools & Resources Webinar

Remediation to Restoration to Revitalization (R2R2R) *An Approach to Connect Programs, Research, and Societal Needs*

Wednesday, December 14, 2022 at 3:00 to 4:00 PM ET

REGISTER HERE

*Certificates
of attendance are
offered!*

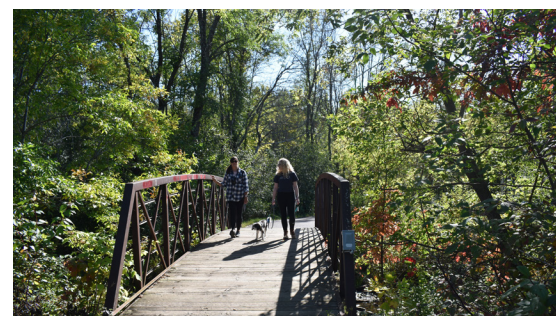

There are increasing calls for integrating social sciences and public health knowledge into environmental problem solving undertaken by many environmental agencies to implement environmental justice mandates and apply traditional ecological knowledge.

Remediation to Restoration to Revitalization (R2R2R) is a conceptual model that acts as an integrative framework to harmonize the social and biophysical dimensions of environmental actions and demonstrate how to better connect environmental outcomes with societal values.

This webinar will present several frameworks and examples to demonstrate how to integrate social and health sciences into environmental project planning.

Who should attend? States, tribes, local governments, non-profits, academic institutions and other organizations interested in learning more about using the R2R2R approach.
